

Dear Colleague,

our University is involved in the organization of the International Congress "SUNLIFE Renewable Energy: from the past towards the Future" and the "SUN-LIFE Ecomobility" Rally. These two connected events are part of the SUNLIFE project in collaboration with Università del Salento (Italy), Region of Epirus (Greece), the Hellenic Institute of Electric Vehicles (HEL.I.E.V.) (Greece) and the Automobile and Touring Club of Greece ELPA.

The Congress will cover the subject of renewable sources of energy and the future possibilities for a maximum use in favor of environment and global economy. The Congress will take place in Lecce (Italy) on the 21st of May 2008 in the conference room of the Rectorship, a wonderful historical palace (Convento del Carmine - piazza Tancredi n.7) placed in historical center of the city. In the courtyard of the palace visitors will have the chance to admire the cars that will be involved in the Rally starting the day after.

The Rally will start from Lecce (Italy) on the 22nd of May 2008 and will finish in Ioannina (Greece) on the 25th of May 2008. The Italian leg of the rally will cover the path from Lecce to Bari through the famous car racing track of Nardò. More information about the "SUN-LIFE Ecomobility" Rally are available at <http://www.heliev.gr>

Further information and a dedicated webpage on the Congress will be available as soon as possible at the same link.

For more details please do not hesitate to contact:

- Dr. Gianpiero Colangelo (gianpiero.colangelo@unile.it) for the Congress;
- Dr. Paolo Carlucci (paolo.carlucci@unile.it) for the Rally.
